

Big Game Telescopic Fishing Pole Super Hard 2.4M 2.7M Collapsible Fishing Rod

Our Product Introduction

Basic Information

- Place of Origin: Shandong, China
- Brand Name: Sunrise
- Certification: ISO
- Model Number: 223
- Minimum Order Quantity: 600 Pieces
- Price: 24 USD/Piece
- Packaging Details: Negotiated / Standard Package
- Delivery Time: Negotiated / 20 Working Days After Payment
- Payment Terms: T/T
- Supply Ability: 20000 Pieces/Month

Product Specification

- Product Name: Carbon Telescopic Fishing Rod
- Material: Carbon
- Top Diameter: 2.8mm
- Hardness: Soft
- Position: STREAM, River, Lake, Ocean Beach Fishing, Ocean Boat Fishing, Ocean Rock Fishing, Reservoir Pond
- Category: Lure Rod
- Fishing Rods Type: Spinning Rods, Casting Rods, Freshwater Rods, Sea Bass Rods
- OEM: Acceptable OEM Fishing Rod
- Highlight: **Big Game Telescopic Fishing Pole, Telescopic Fishing Pole Super Hard 2.4M, 2.7M Collapsible Fishing Rod**

Product Description

Big Game Super Hard 2.4M 2.7M Pike Catfish Carbon Telescopic Fishing Rod

30T CARDON

CARBON

Increase breaking and lifting strength by over 30% compared to standard graphite blanks. These proprietary blanks are not only strong and light but may just be the most sensitive rods you've ever had in your hands.

Key Attributes

Place of Origin	Shandong, China
Ships From	China
Top Diameter	2.8mm
Hardness	Soft
Position	STREAM, River, Lake, Ocean Beach Fishing, Ocean Boat Fishing, Ocean Rock Fshing, Reservoir Pond
Category	Lure Rod
Fishing Rods Type	Spinning rods, Casting rods, Freshwater Rods, Sea Bass rods
Brand Name	CUSTOMISED
Model Number	223
Material	Carbon
Product Name	Carbon Telescopic Fishing Rod
Type	Spinning Casting Fishing Rod
Size	2.4m&2.7m

Lure Weight	20-100g
Line weight	15-35LB
BUTT DIA	16.5mm
OEM	Acceptable OEM Fishing Rod
Section	5 Sections

30-Ton graphite

Length	Type	Sections	Lure weight	Line weight	Top diam	Butt diam
2.4m	spinning	5	20~100g	15~35lb	2.8mm	16.5mm
2.4m	casting	5	20~100g	15~35lb	2.8mm	16.5mm
2.7m	spinning	5	20~100g	15~35lb	2.8mm	16.5mm
2.7m	casting	5	20~100g	15~35lb	2.8mm	16.5mm

A carbon telescopic fishing rod is a type of fishing rod designed for portability and ease of storage. These rods are constructed primarily from carbon fiber materials and feature a telescopic design that allows them to be extended for use and collapsed for transport and storage. Here are some key features and considerations when it comes to carbon telescopic fishing rods:

Material: Carbon fiber is the primary material used in the construction of these rods. Carbon fiber is known for its lightweight and strong properties, making it an excellent choice for portable fishing rods.

Telescopic Design: The telescopic design allows the rod to be extended to its full length for fishing and collapsed down to a compact size for transportation. This design makes it convenient for anglers who need a rod that can easily fit into a backpack, suitcase, or car trunk.

Length: Carbon telescopic fishing rods come in various lengths, typically ranging from 6 to 12 feet or more, depending on the specific model. The length you choose should be suitable for your target species and fishing conditions.

Action and Power: These rods come in a variety of actions (e.g., fast, medium, slow) and powers (e.g., light, medium, heavy). The choice of action and power should match the type of fishing you plan to do and the size of fish you expect to catch.

Line Weight and Lure Rating: Pay attention to the recommended line weight and lure rating specified by the manufacturer. This information will help you select the right fishing line and lures for your rod.

Number of Sections: Carbon telescopic rods typically have multiple sections that slide into each other when extended and collapse when stored. The number of sections can vary, with more sections usually resulting in a shorter collapsed length.

Reel Seat: Ensure that the reel seat is compatible with the type of reel you plan to use, whether it's a spinning reel or a baitcasting reel. The reel seat should securely hold the reel in place during fishing.

Guides: High-quality guides with smooth inserts are essential for casting and retrieving line smoothly. Look for guides that are durable and resistant to corrosion.

Handle: The handle of a telescopic rod can vary in length and material. Some have cork or EVA foam handles for comfort, while others may have shorter handles for compactness.

Price: Carbon telescopic fishing rods are available at various price points. Consider your budget and fishing requirements when choosing a rod.
